

Table. Research questions.

No	Research question	Motivation
Q1	What is the temporal distribution of primary studies?	Identify trends and behaviors in relation to the interest in proposing solutions to evaluate DevOps.
Q2	What is the geographical distribution of primary studies?	Identify the geographic regions in which the greatest efforts have been made in defining solutions to evaluate DevOps.
Q3	What are the most cited primary studies?	Determine the studies with the greatest impact that seek to propose solutions or initiatives to evaluate DevOps.
Q4	What are the research methodologies or instruments used in the literature?	Identify techniques, methodologies or protocols used in the literature.
Q5	What is the type of proposed solution?	Identify the proposed methodological solutions to evaluate DevOps.
Q6	Have technological tools been proposed to evaluate DevOps?	Identify the technological tools used to evaluate DevOps.
Q7	What are the types of companies involved in the related studies?	Identify the specific types of companies in which some mechanism to evaluate DevOps has been proposed or applied.
